

Children and young people

Our aim for children and young people is to ensure equitable access to high quality learning from their earliest years through to graduation. This includes ensuring children and young people are engaged in their learning by taking a holistic view of their unique needs and interests, respecting that they are active participants in their learning and can make choices about what and how they learn.

This aim connects the *Set Up for Success* foundation ‘a fair start for every child’ and the *Future of Education* foundation ‘placing students at the centre’. Specific actions supporting this aim are outlined in the phased Implementation Plans for each strategy.

Outcomes: What we aim to achieve

- > **Lifelong benefits of Education:** Quality education supports positive outcomes across the life journey and ensures children and young people can lead happy, healthy and successful lives.
- > **Equity of Access:** Access to two years of quality early childhood education prior to formal school addresses vulnerability and disadvantage, creating a more equitable society in which every child and young person can succeed.
- > **Culturally Safe and Supportive:** Culturally safe and relevant educational contexts support children and young people’s development.
- > **Inclusion:** All children and young people feel safe, supported, and like they belong within their school community. They are encouraged and supported, with opportunities to reach their full potential.
- > **Student Agency:** All children and young people are positively engaged, interested in their learning, and actively involved in shaping their education journey.
- > **Wellbeing:** All children and young people are equipped with skills, strategies and dispositions to meet challenges in a positive way with lower levels of anxiety and depression.

Theory of action

If we focus on ensuring every child and young person feels welcomed and included at early learning and school, connected with their learning, and supported to respond to life’s challenges, **then** children and young people will achieve improved wellbeing and learning outcomes.

How we will measure success

- ✓ School Satisfaction and Climate Survey
- ✓ Post-school destination survey
- ✓ Wellbeing measurement
- ✓ Early childhood efficacy measurements
- ✓ Qualitative – Most Significant Change stories

Our people

Our aim is that our staff feel supported, safe, and empowered to meet the needs of all children and young people. Valuing education professionals and providing opportunities to develop skills through high quality training, mentoring and professional development, as well as supporting leaders to build expert teams will support learning for children and young people.

This aim connects the [Set Up for Success](#) foundation ‘Valuing educators values children’ and the [Future of Education](#) foundation for ‘Empowered learning professionals’. Specific actions supporting this aim are outlined in the phased Implementation Plans for each strategy.

Outcomes: What we aim to achieve

- > **A skilled and stable workforce:** Ensuring all education professionals have access to quality professional learning and development opportunities which promote staff retention so that the workforce continues to grow.
- > **Supporting the workforce to meet children and young people’s needs:** Equipping education professionals to support diverse needs and experiences will help children and young people to develop and learn in safe environments.
- > **Purposeful relationships between education professionals in different settings:** Ensuring purposeful relationships between early childhood education and care services and schools will ensure children and families can be better supported, and educators have more opportunities to grow their skills and connections.
- > **Teaching excellence:** Delivering high quality education practice that supports learning progress and success for every child and young person.
- > **Delivering a workforce for the future:** Building an expanded and multidisciplinary workforce capable of delivering equity of learning outcomes and future focused skills in a way that meets the needs of children and young people in a holistic and integrated way.

Theory of action

If we identify and scale great teaching practice and build a multidisciplinary workforce of highly skilled and supported education professionals, *then* children and young people will have access to holistic learning and supports to meet their learning and wellbeing needs.

How we will measure success

- ✓ School Satisfaction and Climate Survey
- ✓ School Leadership Survey
- ✓ Education Support Office Staff Survey
- ✓ Early Childhood Education and Care sector staff survey
- ✓ Qualitative review of professional learning communities
- ✓ Scholarship uptake and early childhood degree completion

Community Partnerships

Our aim is that collaborative partnerships between early childhood education and care, schools, parents and carers, government, business, and community enhance learning and provide supported transitions and pathways for every child and young person. This includes ensuring parents and carers are active participants in school life and in the learning of their children and young people.

This goal connects to the [Set Up for Success](#) foundation for a 'Every child has a story' and the [Future of Education](#) foundation for 'Strong communities for learning'. Specific actions supporting this aim are outlined in the phased Implementation Plans for each strategy.

Outcomes: What we aim to achieve

>**Connecting transitions:** Providing opportunities for parents and educators, to share information about their child or young person's learning and development journey and involving children and young people in sharing their strengths interests and challenges.

>**Preparing settings for children and young people:** Establishing collaborative relationships across services and schools to support knowledge sharing so that each school is able to meet the needs of children and young people.

>**Children, young people and families only need to tell their story once:** Enabling services and schools to actively share a child or young person's story to encourage more connected systems that are better placed to meet the needs of children, young people and families.

>**Fostering inclusive environments:** Embracing diversity and setting up learning environments where children and young people can feel safe and valued supports their learning and helps to celebrate every child and young person's story.

> **Parent and community partnerships:** Strengthened connections, collaboration and partnerships between children and young people, parents, education professionals, and community services with a focus on better meeting individual learning and wellbeing needs and improving transitions across the education journey.

>**Early years learning:** Integrated approaches to early learning that support smooth transitions and build parent confidence in supporting their children's learning journey.

Theory of action

If we coordinate supports across a child's life journey through meaningful partnerships from early childhood and throughout formal schooling, *then* children and young people will have the best access possible to education and lifelong learning.

How we will measure success

- ✓ School Satisfaction and Climate Survey
- ✓ Parents and Citizens and school boards participation and feedback
- ✓ Community partnerships participation and feedback
- ✓ Qualitative – Most Significant Change stories
- ✓ Qualitative – case studies – what do families want

Systems and supports

Our goal is for all parts of the education system to be aligned, efficient and effective to support enhanced learning outcomes. This means ensuring the systems that support education enable flexible delivery in order to meet diverse needs, including infrastructure, legislation, resourcing and teaching tools, organisational structures and culture, public accountability and reporting, and data and information technology.

This aim connects the *Set Up for Success* foundation for ‘Working together for children’ and the *Future of Education* foundation for placing ‘Systems supporting learning’. Specific actions supporting this aim are outlined in the phased Implementation Plans for each strategy.

Outcomes: What we aim to achieve

- > **Connected services and systems:** Building stronger connections, improving service access, and supporting information sharing to create an environment where services can connect with families through a ‘no wrong door’ approach.
- > **Community leadership:** Ensuring educational services are informed by the voices and perspectives of Aboriginal and Torres Strait Islander Communities in order to embed communities of kinship and care into our preschools and schools.
- > **Planning and Infrastructure:** Building early childhood education considerations into planning decisions and ensuring schools are built, modernized, and maintained to meet the needs of our growing city. This includes providing sustainable, safe and adaptable physical learning environments to meet the future needs of children and young people.
- > **Digital and data systems:** Student learning is enhanced through digital and data systems that support learning anywhere, with data available to enable tailoring of education offerings to match learning needs. ICT systems are contemporary and suitable to a modern education system.
- > **Strategic planning and legislative reform:** Planning and legislative frameworks support schools to meet the expectations of the ACT community for high quality, safe and inclusive learning environments.

Theory of action

If we deploy intelligent systems, align our planning and legislative frameworks, and invest in quality learning environments, *then* we will enable our leaders, educators, and learners to realise real gain in our classrooms.

How we will measure success

- ✓ School Satisfaction and Climate Survey
- ✓ School Leadership Survey
- ✓ Education Support Office Staff Survey
- ✓ System Evaluations
- ✓ Qualitative – Most Significant Change stories
